PROFILE SUMMARY

Fresher Generative AI Developer with hands-on experience building and deploying production-ready AI applications using LangChain, RAG, FAISS, and Gemini API. Skilled in full-stack development with Next.js and FastAPI. Built and deployed multiple AI projects on GitHub, including a multi-document research assistant and an AI-powered interview platform. Seeking an AI developer role to contribute and grow with a forward-thinking team.

EDUCATION

- | | |
|---|-----------------------------|
| • Bachelor of Technology in Electronics and Telecommunication,
Yeshwantrao Chavan College of Engineering, Nagpur | 2021–2025 |
| • Higher Secondary Certificate (12th),
Shri Samartha Junior College of Science, Akola | 2019–2021
Percent: 93.00 |
| • Secondary School Certificate (10th),
Shri Swami Vivekanand English School, Akot | 2019
Percent: 84.20 |

TECHNICAL SKILLS

- **Programming Languages:** Python, Java
- **Generative AI:** LangChain, RAG, FAISS, LLMs, HuggingFace, Gemini API, Groq API, Ollama
- **AI & Machine Learning:** PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy – ANN, CNN, RNN, LSTM, Transformers, Transfer Learning, NLP, Embeddings
- **Full Stack Development:** React.js, Next.js, Node.js, FastAPI, Flask (REST APIs), Express.js, Tailwind CSS, PostgreSQL, MongoDB
- **Tools & Platforms:** Git/GitHub, Vercel, Render, Streamlit, VS Code, Figma, Power BI

EXPERIENCE

- **Web Development Intern (6 Months)** | Elecstark | Jan – June 2025
 - Built a full-stack e-commerce website with product listings, cart, and checkout functionality using React.js and Node.js.
 - Designed and integrated REST APIs for product management, user authentication, and order processing.
 - Collaborated on UI/UX improvements using Figma prototypes, reducing design-to-development handoff time.
- **UI/UX Developer Intern (1 Month)** | S S InfoTech | July – Aug 2025
 - Developed multiple UI/UX designs for client projects using Figma and Canva.

PROJECTS

AI Interview Mocker

[GitHub](#) | [Live Demo](#)

- **Tech Stack:** Next.js, React.js, Gemini API, Tailwind CSS, Clerk, Neon (PostgreSQL), Node.js, Vercel
- Developed a full-stack AI platform that simulates real job interviews using Gemini AI to generate dynamic, role-specific questions and provide instant feedback with ratings and improvement suggestions. Implemented speech input, webcam preview, and a user dashboard with secure Clerk authentication and persistent storage via Neon PostgreSQL.

Multi-Document Assistant

[GitHub](#) | [Live Demo](#)

- **Tech Stack:** Next.js, LangChain, Python, FastAPI, FAISS, RAG, Groq API, Render, Vercel
- Developed a production-ready AI-powered document research assistant that ingests multiple file formats (PDF, DOCX, CSV, TXT) and websites, converts them into searchable knowledge bases, and provides accurate question-answering using advanced language models. The RAG system dynamically retrieves relevant document chunks and generates contextually grounded responses.

Image Classifier

[GitHub](#) | [Live Demo](#)

- **Tech Stack:** TensorFlow, MobileNetV2, Python, Flask, Next.js, Tailwind CSS, Render, Vercel
- Built an image classification web app using a fine-tuned TensorFlow MobileNetV2 model trained on 11K+ labeled animal samples. Deployed a Flask-based REST API on Render for model inference and a Next.js frontend on Vercel for image upload and result visualization.

YouTube Chatbot

[GitHub](#) | [Live Demo](#)

- **Tech Stack:** LangChain, Python, HuggingFace Embeddings, Groq API, YouTube Transcript API, FAISS, Streamlit
- Built a RAG-based AI chatbot that answers questions from any YouTube video by extracting transcripts, chunking them into a FAISS vector store, and retrieving context-grounded answers using Groq LLM and HuggingFace embeddings via a Streamlit frontend.
